Waiting or monitoring loop
Self-imposed rule
Proxy objective
Standing role
Bounded side task
Early stop
Carry-over from previous goal
Internal (own rule or plan)
Task finished / no next step seen
Pending dependency
Lull / unchanged state
Clock or self-set checkpoint
Agent message (no request)
Human request
Agent message exposing a need
Agent request
Human message (no request)
Perceived blocker (misperceived)
Tool or platform failure
Misread state or clock
Operator decision
